

Empower Your Florida Students to Become College, Career & Military Ready

In order to engage today's tech-savvy and diverse student populations with college, career and future planning, educators need an innovative solution. You need a program that helps every student, regardless of background, ability or pathway create their successful futures. Our full K-12 solution offers rich information and helps students achieve the insight they need to transform aspirations into actionable plans. Here's how:

1 Designed with a student-centered approach

Built with thousands of hours of research with educators, Xello puts students at the center of their journey of self-discovery. Unlike any other program, Xello delivers a modern student experience that mirrors the software they already use. Our program empowers students to discover more about themselves by encouraging them to record and reflect on their strengths, skills, and interests. When they realize they have a hand in carving their own destiny, that's when the switch flips, and they see the benefit in showing up and proactively engaging in school—even in a remote or hybrid learning environment.

2 Full K-12 solution catering to all students of all pathways

Most programs focus on supporting secondary students, and often need to be manipulated to properly support students in younger years. Xello supports your entire K–12 student population. Spark self-discovery, spur career curiosity, and build future readiness skills through Xello's engaging, age-appropriate experience for K–5 students. Built with the same hallmarks as the Xello 6–12 experience, you can give your elementary students early exposure to the world-of-work and watch them seamlessly transition into the middle and high school program.

3 Ready-made curriculum that supports your SEL programming

Xello embeds grade-specific digital lessons to help your K-12 students build the competencies required for future success. With over 140 activities, Xello's lessons provide a turn-key curriculum that teaches real-world skills and social-emotional competencies like financial literacy, planning, communication, and critical thinking. Lessons guide students through learning experiences that help them develop in five core SEL areas aligned to college and career readiness.

4 Streamline educator efficiency and productivity

Educators gain valuable insights with engagement and profile reports at the student, school, and district level. Easily manage students' plans with Xello's fully integrated course planner, and college application tools. Customized to seamlessly integrate with your Student Information System (SIS) and course guide, Xello helps you ensure students are on track to meet graduation requirements -- and for those who are college bound, ensuring successful admission. With access to student profiles, educators get a snapshot of each student's skills, interests, and activities in Xello. At a glance, you'll better understand who your students are and their goals, making conversations more meaningful.
